

Annual lump sum payments weighing you down?

With EasyChoice, there is no upfront lump sum payment... and no surprises at the end of the year.

Does your worker's compensation insurer require an upfront payment? Many do, insisting that you pay 50, 80, even 100% of your yearly premium upfront. That can have substantial impact on your cash flow.

Fortunately there's EasyChoice. With EasyChoice you get high-quality worker's compensation coverage from one of the nation's leading insurance carriers — but you pay your premiums each pay period, improving your cash flow.

Other worker's compensation insurance programs base their premiums on estimates of your annual payroll. If these estimates are inaccurate, you're stuck with a large bill at the end of the year, but with the EasyChoice program, your premiums are based on actual payroll, so you avoid surprises at year end.

EasyChoice is offered through The Hartford, one of the nation's premier workers' compensation insurance carriers. Their licensed consultants are knowledgeable about your state's insurance requirements — they will work with you to design a plan tailored to the specific needs of your business.
